

The DX Bulletin

ISSUE 132 MARCH 8, 1982

PROPAGATION: Mar 8, Low Normal; Mar 9, Below Normal; Mar 10, Low/Below Normal; Mar 11, Low Normal; Mar 12, Below Normal; Mar 13, Disturbed; Mar 14, Low/Below Normal; Mar 15, High/Low Normal; Mar 16, Below Normal; Mar 17, Low Normal; Mar 18, Low-Below Normal; Mar 19, High/Low Normal; Mar 20, 21, Low Normal. TNX N4XX.

KP2A/KP1 has now been confirmed. Nine operators will meet in Kingston Jamaica Mar 15, then procede to Navassa and hope to be on the air the morning of Mar 16. They'll run four or five stations around the clock on 160-6 Meters. Departure is set for the morning of Mar 22 and the radio operation will probably close on Sunday evening, Mar 21. Operators include: N200, WA2MOE, K8CW, K000, K1MEM, KP2A, W2IJB, N6CW, and W0DX. QSL to the KP2A Callbook address.

ZK1CG/N, Victor Rivera, now on from Manihiki (N. Cooks), after some problems getting his generator and antenna off the boat which took him there. He began operations on Mar 3 using battery power, expects to be there until about Mar 15, and works SSB only. The first day of operation found him on the W7PHO 10 Meter gathering on 28575 at about 0100Z.

Yep, it is 5W1DC, and Karl will be active from there until about Mar 13, then on to Tokelau and ZM7VU. Says he will honor requests for contacts on any of the three new bands, too. CW only.

VK9YT (VK30T) and VK9YM (K1MM) will leave Cocos on Mar 10. They have worked mostly CW so far. Conditions the first few days of the operation at the end of Feb were terrible but picked up around Mar 1. They have been trying to work into the Eastern and Central states on 40 and 80, with not much success. Best bet for 40 is long path around 2300Z and on 80 a little later. On 20, they come in on the long path starting about 1100Z then switch to short path about 1230Z.

VK9NM/LH (Lord Howe) last week was by DJ5CQ and should have ended by now; even the German bulletins had no advance word about this. Rumor has him going to Norfolk Island before returning to Germany.

3V8DX was by at least two English amateurs, and three different QSL managers have so far been mentioned; we are confirming before sending you in the wrong direction for a card; stand by.

4Z4TT now saying he will not have a license for the Andaman Islands until he gets there (in India); date being mentioned is Mar 15 or 17.

VK3VU was scheduled to stop at Tonga Mar 26 to Apr 15, but may have to scrub the stop. Cyclone Isaac hit the island Mar 3 with winds of 170 mph, and news reports say 90 percent of the houses were leveled.

Andy, ZD9BV, is on the air from Tristan da Cunha, sort of. He did antenna testing on Feb 27 and 28, and became a legal station Mar 1. KC4CT is the Big Cheese list-maker, with help from a number of other stations. 21388 is the freq on 15 and 28620 on 10, anywhere from 1700 to 1900. Andy tries to show at 1930 on 21338.

ZD9BU put a beam together for Andy, but Andy didn't know which was the front and which was the back of the aerial. The first couple of days he was about four S-units weaker than ZD9BU/MM, using the same power to a vertical on his boat. Andy should be on for some time if he doesn't get discouraged in the beginning.

The DX Bulletin (ISSN 0279-8077) is published weekly fifty times per year for \$26 per year in the U.S., Canada and Mexico; all others \$35 per year. The DX Bulletin is published at 306 Vernon Ave., Vernon, CT 06066 Second-class postage paid at Vernon, CT. POSTMASTER: Send address changes to The DX Bulletin, 306 Vernon Ave., Vernon, Connecticut 06066

CORRECTION to last week's list of vhf gathering frequencies: Gary/Hammond region of Northwestern Indiana is 145.50.

Budget reductions by the government will affect those WWV 18-minute-after-the-hour forecasts in 1983, which are fed to WWV by the National Oceanic and Atmospheric Administration. The losses would include 24-hour/day alerts and forecasts, WWV broadcasts of the geophysical alerts, and the weekly "Preliminary Report and Forecasts of Solar Geophysical Data. You can comment to Donald J. Williams, Director, Space Environment Laboratory, NOAA, Boulder CO 80303.

Sweden's Sundsval DX Group announces that one of its members, Eric Sjolund, SM0AGD, will be touring the U.S. for a few weeks in April, then will join the yacht "Marathon" in the Pacific. The Marathon is already afloat with SM0MAQ aboard and can sometimes be found on 14300 after 0400Z. Eric will make stops and hopes to operate from The North Cooks, Tokelau, Central Kiribati (T31), Baker (KH1), and West Kiribati (T30). This operation will be aided by the Northern California DX Foundation.

Although he got an official letter stating that amateur radio is not permitted in Mozambique, WA4SKE, Bob Black, will make one last try for a C9 license by telephone when he is in Zimbabwe next month. He is not optimistic.

Our earlier report that amateurs in Ghana have been ordered to turn in their transmitters has been confirmed. An American working for a commercial firm in Accra was arrested early in January for taping military communications during the coup Dec 29, and it is believed he is a ham.

The W5YI Report (a general interest newsletter out of Dallas) has an interesting story on the controversial Dick Bash license courses in their latest issue. Editor Fred Maia (W5YI) attended recent seminars for General and Advanced class tests conducted by Bash in Dallas. These intensive eight-hour classes now cost \$150 each, and success is guaranteed; if you flunk the exam you can continue taking the courses free until you pass. Maia reports that none of the

students in the classes he sat in on failed to make the grade when FCC came to town. Fred also noted the students weren't exactly your tobacco-chewing, semi-literate CB types. Most of them were college graduates, 40 percent were women, and all professed to just not have the time to study on their own.

An FCC insider says don't expect U.S. amateurs to have 10 MHz privileges for up to two years from now. They have been pressured by "certain unnamed groups" and refuse to cave in and give us what probably half the world already has. By the way, that FCC NPRM regarding giving General class amateurs (and above) 14150-14200 is # 82-83, and tentative deadline for comments is July 1.

Weisbaden Amateur Radio Club announces its annual expedition to Leichtenstein for May 21-30. They will sign DA1WA/HB0 again this year, QSL manager is DJ0LC, and they will be working all bands 160-10 Meters, including the three WARC bands. RTTY, too.

AC3PT died late in January; he was the king of Sikkim and an active amateur for many years, until 1973, when India intervened in a domestic Sikkim situation and the King was placed under house arrest. He subsequently fled to the United States.

Kenwood's new TS-930 is expected to be unveiled around the time of Dayton Hamvention (end of April). It will sell for \$2000 and features quadruple conversion receiver, all solid state (250 watts out) full CW QSK, dual digital vfos with eight memories, and built-in audio cw filters. This new radio is aimed directly at the Yaesu FT-1 (still not de-bugged) and indirectly at the Collins KWM-380.

Late word on 3V8DX: try G3SVK for CW contacts and G4JDT for SSB QSOs. Some in need of QSL help are K1DP (C9MFJ '75); WA2SON (VS9AAI '61); WA5TOS (OD5MZ '81, VE6CKS/SU '79, and OD5NC '78); K6GNX (P29PS and ZP5XJA); WA4SAC (5Z4CA).

Open House Net (VK6YL, 14332 at 1030 Z) still good for VK9ZH Willis and VK0AN Macquarie most days. VK0AN especially regular there on Tuesdays.
